

**Russian Nuclear Materials & Enrichment Services
in the World Nuclear Fuel Market
(Supply & Demand) in 2019-2040.**

International Business Relations, LLC (IBR™)

Moscow, 2020

ABOUT INTERNATIONAL BUSINESS RELATIONS CORPORATION (IBR™)

IBR™ was established as consulting and engineering company working in the field of nuclear power and nuclear fuel cycle in Russia and the NIS. Working in close cooperation with domestic and foreign business partners the company provides a broad array of integrated services that enhance worldwide commercial developments. With vast experience of its staff IBR™ is prepared to meet all requirements of customers.

Now IBR™ is an experienced, steadily operating and developing company. The IBR™ personnel possessing knowledge of both the nuclear technologies and project & financial management is in a position to solve the most complicated tasks in various fields of nuclear technologies and industry.

IBR™ is proud of its collaboration with the national and overseas partners including many worldwide known companies and organizations.

Notice

The information contained in this report has been collected by International Business Relations, LLC (IBR™) from sources we consider reliable and/or calculations consistent with technical principles we consider applicable.

The report and the information it contains are proprietary to IBR™. IBR™ reports are prepared especially for clients and are furnished to them for their personal use. Except for internal use by IBR™ clients, no part of this report or the information it contains may be reproduced, stored in a retrieval system, or transmitted to their partners in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior written consent of IBR™. IBR™ reports and copies of any portion thereof may not be rent, sold or given to third parties without express written permission from IBR™.

Table of Contents	2
List of Tables	3
List of Figures.....	4
List of Abbreviations & Measurement Units	5
Summary	6
Introduction. Structure of the Report.	7
Chapter 1. Rosatom's Plans and IBR's Forecast of the Development of the Russian Nuclear Fuel Cycle Industry.....	10
1.1 Rosatom's and IBR's Forecasts of Future Demands for EUP Produced in Russia.	10
1.1.1 Forecast of Nuclear Power Development in Russia	10
1.1.2 IBR forecast of the Russian nuclear generating capacities and electric power generation growth in the period 2019-2040	13
1.1.4 Forecast of Russian-designed NPPs Construction in other Countries.....	18
1.1.5 Demands for Russian EUP on the Foreign Markets	41
1.2 Official Plans and IBR's Forecast of Natural Uranium Production, Use of Secondary Sources and Import of Uranium into Russia	49
1.2.1 Uranium Production in Russia	49
1.2.2 Uranium Production in Kazakhstan	53
1.2.3 Use of Secondary Sources to meet Demands for Enriched Uranium Product	55
1.2.4 Import of Uranium into Russia	59
1.3 Official Plans and IBR's Forecast of Russian Uranium Enrichment Industry Development	62
Chapter 2. Description of Algorithms Used in Calculations of Supply-Demand Balances.....	64
2.1 General Approach	64
2.2 Algorithms Used for the Period from 2019 to 2023.....	67
2.3 Approach Used for the Period 2023-2040	68
2.4 Results Tables.....	70
Chapter 3. Analysis of the Future Supply-Demand Balance. Rosatom's Scenario and IBR's Forecast	72
References	82

List of Tables

Table 1.1 New NPP construction plans in accordance with “General scheme of electric power facilities in the period up to 2035” (2017)	11
Table 1.2 Contemplated dates of commissioning new NPP and phasing out obsolete NPP units according to SC Rosatom plans in the period of 2018-2040.....	13
Table 1.3 IBR assessment of commissioning new NPP units and decommissioning NPP units with exhausted life in the period of 2018-2040.....	15
Table 1.4 Forecast of the Installed Nuclear generation capacity and the amount of EUP needed by Ukraine in the period of 2019-2040.....	17
Table 1.5 Opportunities for Construction of Russian-designed Nuclear Power Plants outside Russia before 2040	19
Table 1.6 Annual EUP Demands for Main Types of Russian-designed Reactors EUP.....	39
Table 1.7 Import Quotas in Accordance with Amendment to the USA-Russia Suspension Agreement dated February 1, 2008.	45
Table 1.8 Results of analysis of ARMZ and Uranium One Holding N.V. mid- and long-term development plans.....	51
Table 1.9 Uranium production at ARMZ and Uranium One Holding N.V.'s mines attributable to Rosatom (i.e. potentially available for the Russian nuclear industry), tU/year	52
Table 1.10 Official (Rosatom's) Scenario. Enriched Uranium Product Produced by RepU Mixing	58
Table 1.11 IBR's Forecast. Enriched Uranium Product Produced by RepU Mixing.....	58
Table 1.12 Official (Rosatom's) Scenario. Sources of Uranium Import into Russia	60
Table 1.13 IBR's Forecast. Sources of Uranium Import into Russia.....	61
Table 1.14 Official Plans & IBR's Forecast. Russian Uranium Enrichment Industry Capacity in 2019-2040..	63
Table 3.1 Comparison of Cumulative Parameters of IBR's Forecasts in 2019-40 in the Current and Four Previous Editions of the Report.	79

List of Figures

Fig. 1.1 Rosatom's Scenario. Russian Deliveries of EUP in All Forms - UF ₆ , UO ₂ , FAs.....	43
Fig. 1.2 IBR's Scenario. Russian Deliveries of EUP in All Forms - UF ₆ , UO ₂ , FAs.....	43
Fig. 1.3 Uranium Production at ARMZ and Uranium One Holding N.V. Mines and Attributed to Russia Production at U1's Mines.....	50
Fig. 1.4 Uranium Production in Kazakhstan and Kazatomprom's Share in it.....	54
Fig. 3.1 Rosatom's Scenario. Natural Uranium Demands, Mining Capacity and Uranium Import	73
Fig. 3.2 IBR's Forecast. Natural Uranium Demands, Mining Capacity and Uranium Import.....	73
Fig. 3.3 Rosatom's Scenario. SWU Demands and Available SWU Capacity	75
Fig. 3.4 IBR's Forecast. SWU Demands and Available SWU capacity	75
Fig. 3.5 Rosatom's Scenario. EUP Production Methods	77
Fig. 3.6 IBR's Forecast. EUP Production Methods.....	77
Fig. 3.7 Rosatom's Scenario. Distribution of Available SWU Capacity.....	78
Fig. 3.8 IBR's Forecast. Distribution of Available SWU Capacity	78
